

Aoxio update instructions for v1.1

Step 1: Backup ! you must backup your all files & database before updating.

Step 2: Download the latest script file and extract it on your pc. Open **updates > v1.1 > uploads** folder there you will see **2 zip files** in this folder and you need to upload those files in your server please follow the below directions carefully.

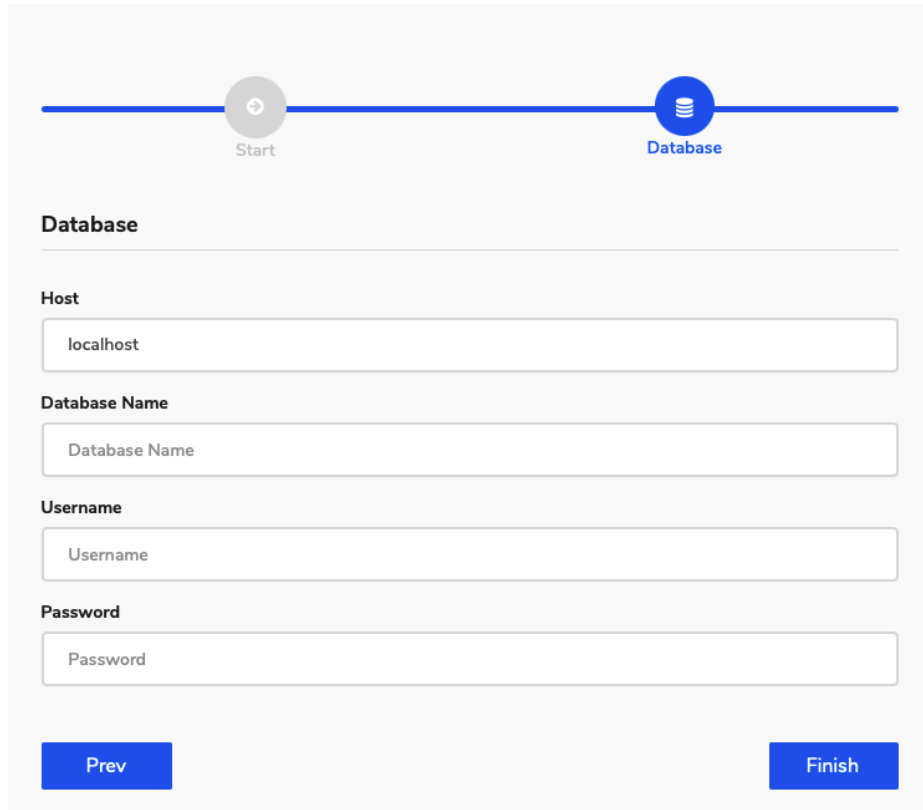

- **application.zip** > upload path: Goto your project **root folder > application** upload this zip file and extract it inside this folder.
- **assets.zip** > upload path: Goto your project **root folder > assets** upload this zip file and extract it inside this folder.

Step 3: Upload “**updates**” folder in your project root folder

Step 4: Open a browser and write a url like this: [www.yourdomain.com/updates/ v1.1](http://www.yourdomain.com/updates/v1.1) you will see a page like below here enter your item purchase code for update this script.

The screenshot shows a web interface for updating the script. At the top, there is a progress bar with two steps: 'Start' (indicated by a blue circle with a right arrow) and 'Database' (indicated by a grey circle with a database icon). Below the progress bar, there is a section titled 'Purchase Code' with a text input field containing the placeholder 'Enter Purchase Code'. A blue button labeled 'Continue →' is positioned below the input field. At the bottom, there is a small text line: 'If you don't know how to get item purchase code on envato please click the below button', followed by a blue button labeled 'Find my Code' with a magnifying glass icon.

Step 5: Here provide your current database credentials and wait a few seconds to update your scripts.
